

A Time to Scream Bloody Murder

The failure of the City of Alexandria to plan is evident in the BRAC at Mark Center. While the debate continues on how to handle the traffic gridlock that this development will bring, City Officials are planning more high rises and more dense development in the Beaugard Corridor.

Stop the madness!

The Seminary Hill Association, Inc., (SHA) seeks collaboration with all West End organizations and residents in a major effort to stop in its tracks the unwanted additional dense development. At the Beaugard Corridor Plan meeting on Sept. 30, SHA will request formally that this planning process be suspended until transportation infrastructure is being built in the West End that will improve the movement of people on Beaugard Street, I-395, Seminary Road, and on adjacent streets.

SHA invites you to join this campaign to:

- Let responsible officials know of citizen opposition to more density in the Beaugard Corridor.
- Change attitudes in City Hall toward out-of-control development everywhere in the West End.
- Protect our neighborhoods.

Rally events to attend:

- October 5—Planning Commission work session on the Beaugard Corridor at 6:30 p.m. in City Hall.
- TBD in October—City Council work session on the Beaugard Corridor in City Hall.
- Nov. 2—Distribute information at Congressional polling places.

What can you do?

- Call or email the City Manager, the Planning Director, the Mayor and Members of City Council demanding no increased density.
- Send letters to the editors of the local media.
- Volunteer to distribute flyers to your neighbors at polling places or in your neighborhood.
- Visit the SHA website, www.seminaryhillassn.org, for more information and the emails and phone numbers of officials.

Nancy R. Jennings
President, Seminary Hill Association, Inc.
